SUMMARY

Senior Frontend-focused Full-Stack Engineer with 5+ years turning ambiguous problems into shipped, revenue-relevant systems. Comfortable owning a problem end-to-end, from architecture through execution and outcome.

TECHNICAL Skills

Frameworks & Languages: Vue.js, Nuxt.js, React.js, Next.js, TypeScript, JavaScript, HTML/CSS.

UI & State: Tailwind CSS, Shadcn, Pinia, Vuex, Zustand, Recoil, Zod, Micro Frontends.

APIs & Data: GraphQL, REST APIs, WebSocket.

DevOps & Infra: Docker, CI/CD Pipelines, Vercel, GitHub Actions.

Tools & Testing: Vitest, Playwright, Sentry, Storybook, Git, npm, Vercel, Turborepo.

Quality & Performance: Accessibility (a11y), Web Performance, Core Web Vitals.

Other: Node.js, PostgreSQL, MongoDB, Prisma, Hasura, Payload, OpenAI API, Clerk, Stripe.

EXPERIENCE

Testlify

Senior Software Engineer

January 2025 – Present

Mumbai, India (Remote)

- Architected the frontend for an AI-powered meeting notetaker in collaboration with AI engineers and designers, eliminating **\$24K+** in annual operational costs.
- Led the architectural decision to replace WordPress with Jamstack for an **11,000+ page** marketing site, aimed at cutting page load times and reducing bounce rates through faster content delivery.
- Shipped a timesheet platform used company-wide and by external customers, replacing a third-party tool and cutting **\$9K+** in annual licensing costs.
- Owned the creation and adoption of a stateless component library shared across **4 applications**, published as a private npm package, removing per-app UI duplication.
- Directed a 1EdTech-certified LTI 1.3 integration connecting Testlify to **2 major LMS platforms** (Canvas, Moodle), syncing assessments and grades directly to the gradebook.

FuelBuddy

Software Engineer

September 2023 – December 2024

Gurugram, India

- Built a kiosk app from scratch for new fuel-dispensing hardware, deployed across **50+ fuel-trucks** processing 1,000+ daily transactions via real-time IoT data, automating delivery calculations and invoicing.
- Standardized TanStack Query across **5 products**, aligning 4 frontend teams on a unified server-state architecture and eliminating stale-data defects.
- Introduced Vitest for unit testing and Playwright for E2E testing, automating **16,000+ test cases** and cutting manual QA effort per release.
- Mentored **8 engineers** through code review, pairing, and onboarding support, driving faster ramp-up and stronger coding standards across the team.
- Migrated a Progressive Web App to React Native, hitting **100% feature parity** across 14 user flows in 8 weeks.

Modocosm

Software Engineer

July 2021 – August 2023

New York City, US (Remote)

- Modernized **7 legacy websites** with Astro.js and Directus CMS, doubling content publishing speed.
- Developed a social analytics dashboard automating cross-platform video performance tracking for a news media client, eliminating **15+ weekly** manual spreadsheet reports.
- Reverse-engineered Directus's schema-write behavior and replaced manual UI setup with SQL scripts, cutting schema setup from **3 hours to 5 minutes**.
- Delivered **4 CMS-driven** responsive websites, optimizing performance, accessibility, and page load speed.

PERSONAL PROJECTS

MonoStart | Chrome Extension

Live | GitHub

- Converted Chrome's default new-tab page into a fully client-side, open-source productivity dashboard, with no accounts, servers, or tracking.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Bachelor of Technology in Computer Science and Engineering

Lucknow, Uttar Pradesh

August 2017 – May 2021
