

PAURUSH RAI

Senior Full - Stack Engineer | React / Next.js / Node.js / TypeScript / GraphQL

📞 +91 7800055099 | ✉️ paurushrai96@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 🌐 Portfolio

Technical Skills

Core: JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, GraphQL, REST APIs, PostgreSQL, MongoDB.

Frontend: Tailwind CSS, Shadcn, HTML/CSS, Vue.js, Nuxt.js, Micro Frontends.

AI, Cloud & Automation: OpenAI API, LLM Integration, MCP, AWS, n8n.

Data & Infra: Prisma, Redis, BullMQ, Hasura, Directus, Payload, WebSocket.

Testing, DevOps & Monitoring: Vitest, Playwright, Docker, GitHub Actions, Sentry, Git, GitHub, GitLab, Vercel.

Also: Zod, Redux, Recoil, Turborepo, Astro.js, Clerk, Stripe.

Experience

Testlify

January 2025 – Present

Senior Software Engineer

Mumbai, India (Remote)

- Chose a Jamstack architecture over WordPress for an 11,000+ page marketing site to lower bounce rates via faster loads and speed up content delivery through the CMS; projected to cut page load times by 60%.
- Architected the frontend for an AI-powered meeting notetaker in collaboration with AI engineers and designers, eliminating \$24,000 in annual operational costs.
- Shipped a timesheet platform used company-wide and by external customers, replacing a third-party tool and cutting \$9,000+ in annual licensing costs.
- Engineered a team-wide VS Code extension that auto-logs Jira time from Git branches into Appforest Timesheets, trimming hands-on tracking effort by 70%.
- Decided on a stateless component library over per-app duplication for consistent, reusable UI across a suite of 4 applications; published as a private npm package, shortening feature delivery by 30%.

FuelBuddy

September 2023 – December 2024

Software Engineer

Gurugram, India

- Built a kiosk application from scratch with embedded, backend, and ops teams, shaving fuel dispensing time by 60%.
- Migrated a Progressive Web App to React Native, hitting 100% feature parity across 14 user flows in 8 weeks.
- Standardized TanStack Query across multiple products, aligning frontend teams on a unified server-state architecture and slashing stale-data defects by 50%.
- Established Playwright as the team's E2E framework, dropping manual QA effort by 40%.
- Mentored seven engineers through code review and pairing, lowering new-hire ramp-up time by 25%.

Modocosm

July 2021 – August 2023

Software Engineer

New York City, US (Remote)

- Reverse-engineered Directus internals to streamline PostgreSQL schema provisioning, shrinking new-project bootstrap time by 70%+.
- Developed a social analytics dashboard consolidating cross-platform video metrics for a news media client, reducing reporting effort by 60%.
- Modernized 7 legacy websites with Astro.js and a headless CMS, doubling content publishing speed.
- Delivered and optimized 4 CMS-driven responsive websites that shipped to production and remain live today.

Personal Projects

MonoStart | Chrome Extension

Live | GitHub

- Designed a Chrome new-tab dashboard replacing the default start page, with a privacy-first, backend-free architecture — zero accounts, servers, or tracking.

Education

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Lucknow, Uttar Pradesh

Bachelor of Technology in Computer Science and Engineering

August 2017 – May 2021
